

GRADUATE CERTIFICATE IN SUSTAINABLE BUILDING CONSTRUCTION

Learn More

Advance your knowledge in sustainable building construction and increase your market value with this credential.

Learn Your Way

Attend online or in-person courses and learn at your own pace. You can even count the certificate credits towards our one-year Master's degree.

Learn For Less

Earn this certificate for under \$10k while you work. Check with your employer for tuition reimbursement programs.

WHO SHOULD APPLY?

This certificate is for you if you intend to learn more about:

- Sustainable building certification systems
- Building energy assessment and modeling
- Design of wood structures, including mass-timber
- High-performance building design
- Building Information Modeling (BIM)
- Managing sustainable building projects

NEXT STEPS

Applicants must have a Bachelor's degree, preferably in a related field (e.g. BCT or other Construction, Architecture, or Engineering degree).

Applications are accepted on a rolling basis at the link below.
